Free Child Safety Seat Clinic

The Beaverton Police Department in a partnership with Safe Kids Coalition-Washington County and C & R Real Estate Services will be conducting a free child car seat clinic. The clinic will be held on Saturday, July 16, 2016 at the Park Place Center located at 4915 SW Griffith Drive Beaverton, Oregon 97005. The clinic will run from 9:00 a.m. to 12:00 p.m. The last car will be accepted at 11:30 a.m. unless demand necessitates an earlier cut off time.

This clinic is designed to teach parents and caregivers how to properly install and use a child safety seat. A properly installed child safety seat will greatly decrease the chance of your child sustaining a serious or life threatening injury during a motor vehicle crash. One of the most important jobs you have as a parent is keeping your child safe when riding in a vehicle. Each year thousands of young children are killed or injured in car crashes. The proper use of car seats helps keep children safe. With so many different car seats on the market, it's no wonder parents find this overwhelming.

Make sure that you have registered your car seat with the manufacture. Registering your seat makes sense: It gives the manufacturer the ability to contact you about recalls and safety notices. It's also easy: Just send in the card that came with your car seat or fill out a simple form on the manufacturer's Web site. Your child's safety could depend on it.

The best car seat is the one that you will use properly. This is what we hope to teach you when you come to one of our car seat clinics. The use of safety belts and child safety seats have been proven to greatly reduce your chances of sustaining serious injuries during a motor vehicle crash.

A certified technician will help parents and caregivers learn to install and use their child safety restraints properly. No appointment is required just drop by during the event. Each car seat check will take about 30 minutes. The last car will be accepted at 11:30 a.m. unless demand necessitates an earlier cut off time.
